Node.js + MongoDB + Flutter Course
2025(Current)

Language

- English
- Japanese - N4

Key Strengths

- Learning new and new skills
- Hardworking
- Good attitude/Communication

About Me

Shine Maung Oo

Web Developer

I'm a Web Developer with over 2 years of experience building full-stack web applications. I specialize in React, Next.js, Vue.js, Node.js, and Laravel, with a strong focus on clean code, scalability, and great user experiences.

Currently leading projects at Host Myanmar Company Limited, I collaborate with cross-functional teams, guide junior developers, and deliver reliable, high-performance web solutions. I'm also exploring React Native for mobile development.

Skills

Html, CSS	<div></div>	Javascript	<div></div>
Typescript	<div></div>	Jquery, Ajax	<div></div>
Vue JS	<div></div>	React JS	<div></div>
Node JS	<div></div>	Next JS	<div></div>
Figma	<div></div>	Wordpress	<div></div>
Php	<div></div>	Laravel	<div></div>
MySQL	<div></div>	Postgres SQL	<div></div>
Bootstrap	<div></div>	Tailwind	<div></div>
React Native	<div></div>		

Job Experience

- Host Myanmar Company Limited**
Yangon, Myanmar
hostmyanmar.net

01/2023 - Present

Responsibilities:

As a Fullstack Developer

Present

- Leading the development and deployment of full-stack web applications using React, Next.js, Node.js, and Laravel, ensuring smooth integration between frontend and backend systems.
- Collaborating closely with stakeholders, designers, and fellow developers to define project scopes, design architecture, and meet client requirements.
- Conducting code reviews, mentoring junior developers, and implementing best practices in coding, testing, and version control.
- Developing custom components and reusable modules to speed up development cycles and maintain code quality across projects.
- Integrating third-party APIs, payment gateways, and analytics tools into dynamic web platforms.

Job Experience

● Host Myanmar Company Limited

Yangon, Myanmar

hostmyanmar.net

01/2023 – Present

Responsibilities:

As a Backend Developer

07/2023 – 01/2024

- Built and maintained secure, scalable RESTful APIs and microservices using Node.js and Laravel.
- Designed and optimized relational database schemas using MySQL and PostgreSQL, ensuring data integrity and query performance.
- Implemented authentication systems, access control (roles/permissions), and other backend functionalities aligned with modern security standards.
- Performed routine server-side debugging, performance tuning, and third-party API integration.
- Created API documentation for internal use and external integration.

As a Frontend Developer

01/2023 – 07/2023

- Designed and implemented responsive user interfaces using HTML, CSS, JavaScript, and frameworks like Vue.js and React.
- Developed pixel-perfect layouts based on Figma design files while ensuring cross-browser compatibility.
- Contributed to the frontend of large-scale projects including university portals and government websites, optimizing for accessibility and usability.
- Integrated frontend interfaces with backend APIs using Axios and AJAX for dynamic data-driven features.
- Participated in sprint planning and regular team meetings to align frontend development with project timelines.

Projects

- MEG Transport Delivery System

A delivering web app platform built with Vue.js (frontend) and Laravel PHP (backend). It includes:
 - Credit Customer App, Delivery App, Agent AppCurrently under active development — only the Point App remains to be completed. The system is designed to streamline transport operations and enhance delivery efficiency.
- Standard Diamond Web App

A product-selling web application built with Laravel (PHP). It includes core business modules such as:
 - Product Management, Cashbook System for tracking income and expenses and Supplier and Customer ManagementSecure admin panel for managing all data and transactions
Designed to streamline operations and support daily business workflows.
- Host Myanmar Website

hostmyanmar.net
 - A modern and responsive company website built using React.js. It highlights company services, projects, and news, with a clean interface and optimized performance.
- Gallery Ohmar CMS Website

galleryohmar.hmm-staging.com
 - Developed using WordPress CMS, styled with HTML, CSS, JavaScript, and jQuery. Focused on clean UI and easy content management.
- Community Forestry Unit Forest Department

cfmyanmar.org
 - The Forest Department (FD) ensures biodiversity conservation and sustainable forest management under the Forest Policy of 1995. This website, built on Laravel, utilizes Google Maps API to showcase Myanmar's forest data, supporting environmental protection efforts and community needs.
